Keep your GUARD Up!
Against stains, abrasion, etching & other enemies of concrete floors.

**LSGuard**
Combines high gloss beauty with a high-performing lithium-silicate hardener for maximum hardness and shine.

- Produces a long-lasting, high-gloss finished concrete floor with maximum light reflectance.
- Eliminates the need for floor waxes, liquid polishes and conventional resin-based coatings.
- Further improves the surface sheen, surface hardness and stain resistance of floors treated with Consolideck® LS® or Consolideck® LS/CS®.
- Tested and conforms to California Collaborative for High Performance School Indoor Air Quality standards. Use can contribute to LEED® for Schools points (EQ Credit 4).
- Won’t contribute to surface crazing. High lithium content combats surface ASR.
- Gloss and hardness do not reduce slip resistance.
- Breathable and UV stable. Won’t yellow, discolor, peel or flake.
- Low odor. Easy to apply. Dries fast.

**PolishGuard**
This durable, chemical-resistant, high-gloss, protective coating dramatically increases the stain resistance of interior concrete floors.

- Produces a long-lasting, tough protective shine on any interior concrete flatwork.
- Helps polished concrete floors resist staining and etching from common food and household cleaning products.
- Perfect for floors hardened/densified with Consolideck® LS® and LS/CS®.
- Adds depth and luster to colored concrete, including surfaces decorated with Consolideck® GemTone Stain and ColorHard.
- Keeps soiling and contaminants from penetrating, making maintenance cleaning faster, more effective and more economical.
- Tested and conforms to California Collaborative for High Performance School Indoor Air Quality standards. Use can contribute to LEED® for Schools points (EQ Credit 4).
- Treated floors maintain slip resistance.
- UV stable. Will not yellow, discolor, peel or flake.

**GuardEXT**
Non-yellowing, protective coating improves the stain resistance and durability of steel-troweled, broomed, stamped and other exterior concrete paving.

- Produces a long-lasting, tough protective shine on any exterior concrete flatwork.
- Perfect for surfaces hardened and dust proofed with Consolideck® LS® or Consolideck® LS/CS®.
- Helps prevent problems related to water penetration of concrete.
- Adds depth and luster to colored concrete, including surfaces decorated with Consolideck® ColorHard.
- Keeps soiling and contaminants from penetrating. Simplifies maintenance cleaning.
- Tested and conforms to California Collaborative for High Performance School Indoor Air Quality standards. Use can contribute to LEED® for Schools points (EQ Credit 4).
- Treated surfaces maintain slip resistance.
- UV stable. Will not yellow, discolor, peel or flake.
