ColorHard

One-step color & hardener for interior and exterior concrete floors

Oregon's Gordon House, colored with Consolideck ColorHard one-step colorant and hardener/densifier.

Consolideck® ColorHard and SLX100® Water & Oil Repellent create a "water-flow" pattern at Monument Valley Elementary School, Utah.

Consolideck® ColorHard is a premeasured color concentrate. Simply mix 4 ounces with 1 gallon of Consolideck® LS® lithium-silicate hardener/densifier, or LS/CS® for a ready-to-use color hardener.

Decorates and dustproofs

ColorHard decorates, dustproofs and improves the abrasion-resistance of concrete floors and exterior pavements.

Easy application

Application is easy – just spray and spread. High-speed burnish color-hardened surfaces to an attractive luster or treat them with the appropriate Consolideck® protective treatment for added luster, enhanced color, improved stain protection or protection from damage caused by de-icing salts.

Interior or exterior

ColorHard color concentrates are available in vibrant hues which can be used alone or in combinations for an unlimited range of shades, tints and artistic effects. Most ColorHard colors are suitable for interior or exterior applications. Concentrated, water-based, environmentally responsible ColorHard minimizes freight, handling, storage and container disposal costs.

- Water-based, environmentally responsible ColorHard saves time, reduces waste and eliminates hazards associated with corrosive acid stains or highly flammable solvent-reduced dyes.
- Vibrant colors change gray or white concrete into abrasion-resistant, dust-proof, colorful, decorative concrete. Layer or blend for unlimited colors and designs.
- Great for any-age trowel-finished, ground or textured concrete.
- May be used over integrally colored concrete, shake-on color hardeners, acid-stained concrete or concrete colored with solvent-reduced dyes.
- VOC Compliant. Non-flammable. Non-toxic. Non-corrosive. Low odor. Suitable for use in occupied spaces.
- Will not etch concrete or corrode nearby metals. Will not peel or flake. No need to neutralize.
- Two coats increase color intensity and may partially mask surface imperfections.
- Easy application with low-pressure spray and push broom or microfiber pad.
- ColorHard is Living Building Challenge Red List Compliant.
